## SUMMARY

Curious engineer and quiet leader eager to work in a collaborative and energetic environment. Adept at learning new technologies and skills, with years of experience in PHP, MySQL, and JavaScript.

## EDUCATION

**Certificate in Web Development** - Saint Joseph's College of Maine, December 2019

**Android Basic Nanodegree by Google** - Udacity, December 2018

**Certificate in Biomedical Science** - Cambridge Biomedical Career Program, May 2010

**Bachelors of Science in Interactive Media Design** - The New England Institute of Art, August 2006

**Coursework in Computer Science** - Framingham State University, December 1999

## SKILLS

PHP	MySQL	CSS/CSS3	HTML/5	JavaScript
Node.js <sup>1</sup>	Express.js <sup>1</sup>	jQuery	Java	JSON <sup>1</sup>
API <sup>1</sup>	LAMP	GitHub/Git	Bootstrap	Visual Studios Code <sup>1</sup>
Postman <sup>1</sup>	MySQL WorkBench <sup>1</sup>			

## EXPERIENCE

**Back End Developer** — Backpack October 2019 – December 2019

- Collaborate with team to create a database that can be accessed with an API using Node.js and Express.js
- Organize and coordinate meeting with members of the team as well as meeting with the CEO of the company via slack, doodle and google calendar
- Attend weekly meeting remotely via zoom or google hangout to discuss project ideas and details.
- Pair programming with team members via github

**Learning Coach** — TEC Connections Academy September 2018 - Present

- Support student with homework and classwork assignments
- Implement learning activities that support areas of weakness, including organization and time management skills
- Ensure that student is working at appropriate learning pace

**Founder/Web Developer** — Nyah's Design September 2002 - August 2007

- Serve customers seeking help with their technical needs, including fixing computers, setting up computer networks, and designing websites.
- Installed Operating Systems (Clean Install and Upgrade) Windows 8/10, hardware like DVD drives, hard drives and memory sticks, and new software programs.
- Used recovery software to find and backup (available and deleted) files to External Drive.
- Met with clients to discuss design ideas and schema colors; then designed a layout using Photoshop and Fireworks
- Programmed sites using Flash and Actionscript 2.0

**Software Developer — The Internet Real Estate Group**

May 2006 - December 2006

- Solely responsible for creating and designing ecommerce site using PHP, HTML, JavaScript, CSS and MySQL
- Imported, managed and maintained data for store's MySQL database
- Conducted quality assurance testing daily, fixing code errors
- Used SVN to download and upload files for error corrections
- Collaborated with other software engineers to ensure customer satisfaction

**Graphic/Web Developer — Project Think Different(Amplifyme)**

July 2004 - August 2004

- Created HTML templates and fliers in a timely manner for upcoming events.
- Delivered products to companies within the downtown area.
- Made and received business calls.
- Entered present and future supporters into an excel mailing list.
- Sent out email for 800 people within the mailing list. Attended business meetings.
